

In locations where it is not possible to erect a boundary treatment on the line of the legal ownership, an additional line will be identified on the plans to illustrate the approximate fence location. The boundary fence will therefore be erected as close to the title boundary as possible without causing damage to the existing features.

This may result in the following items:

- Existing hedgerows/trees and Woodland areas
- Existing boundary fences and significant topographical features
- Proposed and existing retaining structures and foundations.

The resident is responsible for the maintenance of all items with the plot boundary identified by the red edge boundary.
